

Wellbeing activities and conversation starters for parents of primary school-aged children

There are a range of activities that will help build and maintain your child's wellbeing. Most of them are short and require very few materials.

The activities cover six key elements that are important to wellbeing. There are also activities that focus on positive thinking and gratitude as well as breathing exercises that promote calm.

These activities are based on the optional Resilience, Rights and Respectful Relationships teaching and learning materials.

Six key elements that are important to wellbeing

Understanding emotions

Understanding emotions helps your child to understand themselves and other people.

We can do this by focusing on recognising, expressing and managing emotions.

Understanding emotions is key to building empathy and self-awareness.

Personal strengths

Help to build your child's ability to recognise and understand positive qualities in themselves and others.

This will help to build your child's self-confidence and the capacity to face and manage challenges.

Positive coping

Provide opportunities for your child to discuss and learn different types of coping strategies.

This will increase your child's ability to manage stress, control impulses and overcome obstacles.

Problem solving

Your child can develop their critical and creative thinking skills to explore different types of problems.

This can build your child's ability to make responsible decisions that consider the likely consequences of different ways of solving problems.

Stress management

Learn about different calming strategies to deal with stress.

This can help your child to cope with challenges they are facing now and in the future.

Help seeking

In these challenging times, it is important to normalise asking for help.

Your child will learn to recognise situations in which to seek help, identify trusted people in their lives to ask for help and practice asking for and providing help.
